REISSUE DECLARATION

Assistant Commissioner

Box Patent Application
Washington, D.C. 20231

Dear Sir:

We, Arthur E. Uber, III, Seid Waddell, John Stulen and Jon E. Manley, hereby declare that: our residences, post office addresses and citizenship are as stated below next to our names; we believe that we are the original, first and sole inventors of the subject matter described and claimed in U.S. Patent No. 5,494,036, granted on February 27, 1996, and for which a reissue patent is sought on the invention entitled "Patient Infusion System For Use With MRI," the specification of which is attached hereto; we have reviewed and understand the contents of the above-identified reissue application, including the new and broadened claims therein; we acknowledge the duty to disclose information which is material to patentability as defined in Title 37, Code of Federal Regulations, Section 1.56; for the reasons provided below, we verily believe the original

patent to be partly inoperative; and all errors relied upon above and corrected in this reissue application arose without any deceptive intention on our part.

We believe the original patent to be partly inoperative by reason of our claiming less than we had a right to claim in the patent. Specifically, we claimed less than we had a right to claim by failing to independently claim certain features of our invention, such as a dual-syringe injector and a battery-powered injector. Because we claimed less than we had a right to claim in the original patent, we wish to broaden the claims present in the original patent.

We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application, any patent issued thereon, or any patent to which this Declaration is directed.
